

One secure
online
platform

Auditability
for every
single pill

No more
transcription
errors

A single e-health
record containing
your customer's
profile & medication
history.

HealthStream

HEALTHSTREAM IS THE KEY TO THE MPS MEDICATION MANAGEMENT SYSTEM

HealthStream utilises a unique single e-health record that contains your customer's profile and medication history, including all medication prescribed and packed. HealthStream links each medication profile to complete electronic barcoding and auditability of every single pill.

Technology

Web-based software means no need to install or update software in your pharmacy.

Innovation

One secure online platform for all your medication management requirements.

Ordering

Easy electronic ordering and management of your customer's medication.

Efficiency

Maintain 95%+ bulk substitution rates at the click of a button.

Profitability

A more efficient dispensing process means better cashflow.

Accuracy

No more transcription errors or confusion over customer details.
